

PURBA DEY

Computer Science student with hands-on experience in machine learning and AI-based projects.

☎ +918100230070 ✉ purbadeyxb26@gmail.com 🔗 linkedin 🌐 GitHub 📍 Kolkata, India

EDUCATIONS

Holy Child Institute Secondary (X) West Bengal Board Of Secondary Education	Jan 2021 - Jan 2021 CGPA : 89.00
Holy Child Institute Senior Secondary (XII) West Bengal Board Of Higher Secondary Education	Jan 2023 - Jan 2023 CGPA : 85.00
M.C.K.V Institute Of Engineering B. Tech, Computer Science & Engineering Avg Ygpa (till 5th sem): 9.57	Jun 2023 - May 2027 CGPA : 9.57

PROJECTS

Face Verification System (CNN-Based) 🌐 Github - Developed a face matching model using CNN-based embeddings to enhance verification accuracy. - Trained the model on structured datasets containing distorted and reference images. - Implemented similarity-based verification, improving accuracy compared to simple classification methods. - Managed preprocessing, training, and model saving independently. Technologies / Tools Used : CNN, React, Tailwind CSS	May 2026 - Present
Document Signature App student The Document Signature App is a secure, full-stack web application that allows users to upload documents, place digital signatures, share signing links, and generate legally traceable signed PDFs, similar to DocuSign and Adobe Sign. - Eliminates the need for physical paperwork by enabling electronic document signing with comprehensive audit trails, signer identity verification, and document integrity. - Designed for real-world enterprise workflows, incorporating features like authentication, document ownership, status tracking, and signature history. - Showcases modern SaaS capabilities in handling file security, digital trust, and collaborative workflows at scale. Technologies / Tools Used : React, Tailwind CSS	Jun 2026 - Present
Footpath Violation Detection System - Built a computer vision model to detect vehicles illegally occupying footpaths using YOLO as the model. - Used Roboflow for data preparation, annotation, and augmentation. - Trained and evaluated the model to identify cars in pedestrian zones from real-world images. Technologies / Tools Used : YOLO, Roboflow	Feb 2026 - Apr 2026
AgriGuru — AI-Based Agriculture Assistant - Led backend development for pest detection using a CNN model. Developed a Flask API (/detect) to facilitate image uploads and deliver accurate predictions. - Consolidated features such as crop recommendations and weather data into a cohesive system. - Emphasized creating a system that is practical and user-friendly rather than solely theoretical. Technologies / Tools Used : Flask, CNN	Apr 2025 - Apr 2025

SKILLS

Databases :	PL/SQL, SQL plus (Oracle), MySQL, PostgreSQL, MongoDB, Firebase
Frameworks & Libraries :	PyTorch, TensorFlow, scikit-learn, OpenCV, Flask, React, Node.js
Languages :	English, Hindi
Programming Languages :	Python, C, Java, JavaScript, SQL
Soft Skills :	Teamwork, Problem Solving, Adaptability
Tools & Platforms :	NumPy, Matplotlib, Tableau, Amazon Web Services, Linux, GitHub, Git, Postman
